Authority to Implement Number)
Conservation Measures in the 314, 417,)
573, 636, 660 and 816 Area Codes.)

CC Docket No. 96-98

MISSOURI PUBLIC SERVICE COMMISSION'S
PETITION FOR DELEGATION OF AUTHORITY
TO IMPLEMENT NUMBER POOLING IN THE 816 AREA CODE

The Missouri Public Service Commission ("MoPSC") hereby requests the authority to implement thousands-block number pooling trials in the 816 Numbering Plan Area ("NPA") until national number conservation measures are implemented. On July 20, 2000, the Federal Communications Commission ("FCC") granted the MoPSC the authority to implement thousands-block number pooling trials in the 314 NPA.¹ In this petition, the MoPSC requests that the MoPSC be given the authority to implement thousands-block number pooling in the 816 NPA prior to its implementation of thousands-block pooling trials in the 314 NPA for the reasons discussed below.

On November 1, 1999, the MoPSC petitioned the FCC for the additional delegated authority to implement various area code conservation measures in the 314, 417, 573, 636, 660 and 816 area codes in the State of Missouri. In the FCC's March 31, 2000 *Report and Order and Further Notice of Proposed Rulemaking*, the FCC established three criteria to be established by

states in their petitions for pooling authority.² In its April 26, 2000 supplement, the MoPSC demonstrated these three criteria by showing that the 314 NPA was in jeopardy, that the 314 NPA was in one of the largest 100 MSAs, and that the 314 NPA has a remaining life span of at least a year. On July 20, 2000, the FCC granted the MoPSC additional delegated authority to implement number conservation measures, including the authority to implement thousands-block number pooling in the 314 NPA.

Currently before the MoPSC is a petition filed by NeuStar, Inc, the North American Numbering Plan Administrator ("NANPA") on behalf of the Missouri Telecommunications Industry, requesting approval of its relief plan for the 314 and 816 area codes. During the ongoing proceedings to examine the NANPA petition, the MoPSC determined that it would be in the public interest for the MoPSC to request authority to implement thousands-block pooling in the 816 NPA to address current exhaust concerns.

In its July 20, 2000 *Order*, the FCC stated:

[W]e seek to ensure that the benefits of thousands-block number pooling are realized as soon as feasible. Although the FCC's national thousands-block number pooling framework implements pooling on a numbering plan area (NPA) by NPA basis within the largest 100 Metropolitan Statistical Areas (MSAs), we will continue to grant states interim authority to implement pooling on an MSA by MSA basis within their states. A state may expand pooling to another MSA only after having implemented thousands-block number pooling in the initial MSA and after allowing carriers sufficient time to undertake necessary steps to accommodate thousands-block number pooling...

The MoPSC requests that the 816 NPA be designated the "initial MSA" pursuant to the above quote. The MoPSC further states that if this petition is granted, that the MoPSC would not expand pooling to another MSA (including the 314 NPA) until it implemented thousands-block

² *Numbering Resource Optimization, Report and Order and Further Notice of Proposed Rulemaking*, CC Docket No. 99-200, 15 FCC Rcd 7574, March 31, 2000.

number pooling in the 816 NPA and after having allowed carriers sufficient time to undertake necessary steps to accommodate thousands-block number pooling.

The 816 NPA meets two of the three criteria for receiving thousands-block number pooling authority and the MoPSC requests a “special circumstance” waiver of the third criteria. First, the 816 NPA encompasses the city of Kansas City, Missouri, which is in the Kansas City, Kansas metropolitan area, one of the largest 100 MSAs. In the Commission’s Deployment Schedule for Long-Term Database Methods for Local Number Portability found at Title 47 C.F.R. Part 52 – Appendix to Part 52, the largest 100 MSAs are listed. Attachment A contains the Appendix to Part 52 and ranks Kansas City among the largest 100 MSAs at number twenty-eight (28).

Second, the 816 NPA has a remaining life span of at least one year. Attachment B is a table from the NANPA web page³ that lists the status of active and pending NPA relief projects. This table demonstrates that the projected exhaust date for the 816 NPA is in the first quarter of the year 2002.

Third, the 816 NPA is not in jeopardy status. However, due to “special circumstances,” the MoPSC requests that the Commission waive this last criterion. With the approaching exhaust date for the 314 NPA (second quarter of 2001), thousands-block number pooling would be more effective in the 816 NPA as number resources in the 816 NPA rapidly deplete. If given this authority, the MoPSC would have the ability to implement thousands-block number pooling in light of the eminent jeopardy status designation for the 816 NPA.

For these reasons, the MoPSC respectfully requests the authority to implement thousands-block number pooling trials in the 816 NPA. If given this authority, the MoPSC will

³ <http://www.nanpa.com/>.

consider the 816 NPA the initial MSA for thousands-block number pooling purposes and will expand to the 314 NPA only after having implemented thousands-block number pooling in the 816 NPA and after having allowed carriers sufficient time to undertake necessary steps to accommodate thousands-block number pooling.

Respectfully submitted,

DANA K. JOYCE

TELECOMMUNICATION

CHAPTER I--FEDERAL COMMUNICATIONS COMMISSION--(CONTINUED)

PART 52--NUMBERING--Table of Contents

Subpart D--Toll Free Numbers

Sec. 52.109 Permanent cap on number reservations.

(a) A Responsible Organization may have in reserve status, at any one time, either 2000 toll free numbers or 7.5 percent of that Responsible Organization's numbers in working status, whichever is greater.

(b) A Responsible Organization shall never reserve more than 3 percent of the quantity of toll free numbers in spare status as of the previous Sunday at 12:01 a.m. Eastern Time.

(c) The Common Carrier Bureau shall modify the quantity of numbers a Responsible Organization may have in reserve status or the percentage of numbers in the spare poll that a Responsible Organization may reserve when exigent circumstances make such action necessary. The Common Carrier Bureau shall establish, modify, and monitor toll free number conservation plans when exigent circumstances necessitate such action.

Appendix to Part 52--Deployment Schedule for Long-Term Database Methods for Local Number Portability

Implementation must be completed by the carriers in the relevant MSAs during the periods specified below:
